UNDERCUT WALL & CEILING MOUNTED

Sweet® wall and ceiling undercut bin gates are designed to mount on vertical sides or bottom of bins, chutes, and hoppers. Undercut gates are similar in design to Sweet® simplex gates except discharge material is directed diagonally away or off to one side. Flange connections are pre-drilled for easy field installation.

BIN GATES

BIN GATES

DUPLEX MODELS

Sweet® bin gates are all welded heavy gauge plate steel with angle reinforcements. Gate doors are balanced for easy opening and closing, and are replaceable. Each bin gate receives two coats of hammertone industrial enamel paint. All models can be readily adapted to power operation. Pneumatic or hydraulic cylinders provide simple operation and remote control for out of the way locations. Stainless steel and abrasion resistant steel construction are offered as an option. Call for details.

INSTALLATIONS

Easily attached to hoppers, bins, and chutes.

Both gates open and close together at the center with a single movement of the control handle.

SWEET® STANDARD DUPLEX BIN GATES
