

INTERMEDIATE SUPPORT TOWERS

Precision Fabricated Galvanized Steel for Fast and Easy Modular Erection Without Welding, Painting or Field Alteration

Easy bolt together galvanized steel components for ultimate strength and rigidity. High tensile strength, galvanized bolts and hardware make for a "total maintenance free unit".

Heavy base plate provided with each tower. Bolts directly to tower legs and provides easy anchoring to plate or foundation.

Hot dipped, galvanized structural steel option available

Size (ft.)	Vertical Load Rating (lbs.)
