Sweet Manufacturing receives Excellence in Hot-Dip Galvanizing Award

Springfield, Ohio, USA – May 2, 2011 Sweet Manufacturing Company is pleased to announce that it has received the 2011 Excellence in Hot-Dip Galvanizing Award for the Food and Agriculture category. The award was announced by the American Galvanizers Association (AGA) during their annual conference in April. The AGA honors the special skill and efforts of galvanizers, fabricators, architects, engineers and contractors as they complete projects that will remain durable, beautiful, and maintenance-free for generations to come.

Sweet was nominated for the award by one of its suppliers, V&S Columbus Galvanizing LLC, and shares the honor with them. The award, presented annually by the AGA, recognizes the use of after-fabrication hot-dip galvanized steel in an ideal, creative, monumental, or otherwise impressive fashion. Winning projects represent the finest achievement in the use of hot-dip galvanizing in a project design, concept and finished product.
