

WHEN DOWNTIME IS **NOT** AN OPTION... PROVEN EQUIPMENT FOR FRAC SAND

INDUSTRIAL BUCKET ELEVATORS

- Unique bucket configuration for frac sand.
- Sturdy liner for reduced wear, tear and maintenance.
- High temp gasket, seals, pulley lagging and belting used on inside and outside of elevator for improved material handling.
- Self-cleaning wing boot pulley or boot sprocket with tapered bushings and easy access dual boot clean-out.
- Available in galvanized and stainless steel.

GALVANIZED CHANNEL BELT CONVEYORS

- Heavy-duty formed steel channel frame and channel splice.
- Corrosion resistant galvanized finish reduces replacement cost.
- Corrugated and smooth, weathertight and return belt covers available.
- Complete drive packages available from one HP to 250 HP for belt speeds from 100 to 800 FPM.
- Offered in belt widths from 14" thru 72" and can support up to 565 pounds per linear foot (with supports spaced on 20' centers).

BIN GATES

- Duplex, simplex, ceiling mounted, and pneumatic bin gates available.
- Welded heavy-duty gauge plate steel with angle reinforcements.
- Gate doors are balanced for easy opening and closing.
- Stainless steel and abrasion resistant steel available as options.
- Wall and ceiling undercut bin gates are designed to mount on vertical sides or bottom of bins, chutes and hoppers.
